**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Freezing level may be 200 metres higher than shown in the table across the south of the region. Rising freezing levels by afternoon will lead to a thaw of lying snow and wet conditions underfoot especially at lower elevations.

Forecast for Monday 13 Mar 2023

Weather: Low confidence. A cloudy day with rain and snow clearing away south, rain turning to snow to low levels as it turns colder from the north. Clearer with a few snow showers by evening.

Maximum wind: Northerly 30 mph with gusts to 40 mph on the higher tops

Chance of cloud-free hill tops above 800m: 40%, best chance later in the afternoon

Low cloud and visibility: Widely poor in extensive low cloud down to 500 to 800 metres, this becoming more broken in the afternoon before clearing away in the evening. Much improved visibility by evening but temporarily becoming poor in any snow showers

Temperature: **Glens:** Plus 4 Celsius, falling to minus 2 Celsius in the evening
At 800m: Plus 2 falling to minus 4 Celsius
Freezing level: 1000 to 1400 metres, falling to 200 metres by evening
